Computed Tool & Engineering, Inc. Achieves AS9100 Registration

Computed Tool & Engineering, Inc. ensures its commitment to customers by achieving AS9100 registration.

Anaheim, California March 9, 2011 – Computed Tool & Engineering, Inc. is pleased to announce its achievement of AS9100 registration. AS9100 is the newest international aerospace quality standard. This certification signifies the company's commitment to being a world class supplier through quality products, on-time delivery, customer satisfaction and continuous improvement.

The increased requirements of AS9100, which builds on the ISO 9001:2000 standard will benefit both aerospace and non-aerospace customers. Since the standard focuses on critical areas such as process control, quality control and continuous improvement, all industries served will benefit.

Becoming AS9100 certified strengthens the company's competitive position and standardizes quality processes across all its operations. AS9100 is published by the Society of Automotive Engineers, based on the ISO 9001:2000 quality management standard, and provides 80 additional requirements and 18 amplifications specific to aerospace business operations.

"The AS9100 certification is a reflection of continuous efforts and commitments made by our employees and management to provide the highest quality of products and service to our customers." said Patricia Szczuka, Vice-President. "This certification will further increase our customers' confidence that our process-oriented approach will meet their rigorous quality requirements."

CTE's Scope of registration will remain as:

Design, development, assembly, and production of tool and dies, prototypes, pre-production and production parts; Wire EDM, CNC machining services for the electrical, automotive, hardware, and electronic industries.

About Computed Tool & Engineering, Inc.:
